ISSN 0163-7312 Key title: Catalog of copyright entries. Fourth series. Part 3. Performing arts.
For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

preface

The *Catalog of Copyright Entries* for 1978 begins a new series. Published by authority of section 707 of Title 17 of the *United States Code,* this new Fourth Series coincides with the implementation of the Copyright Act of 1976 (Public Law 94-553).

The *Catalog* is divided into eight parts. Five of these parts correspond to the administrative classes established under section 408(c) of Title 17 of the *United States Code.* Three additional parts consist of categories of works within these classes: maps, motion pictures/filmstrips, and serials/periodicals. The table at the end of this preface shows the organization of the *Catalog* and the registration class designators. The parts of the *Catalog* in which each entry is published are determined, in some cases, by both the registration class and the nature of the work covered by the registration. Some issues, therefore, will contain entries for registrations in classes in addition to those designated in the table.

All works listed in the *Catalog* are entered under title, with an index of authors, claimants, and other names associated with the work. Filing is word by word. Titles which consist only of special characters are at the head of the *Catalog,* followed by titles beginning with Arabic numerals filed in numerical sequence. Each entry includes a bibliographic description followed by data relating to the copyright claim (name of the copyright claimant as given in the application for registration, date of creation, date of registration, copyright registration number, etc.). Except for renewals and supplementary registrations, the descriptive portion of the entries is formulated in a modified ISBD (International Standard Bibliographic Description) format. Some deviations from the prescribed format were necessary to better meet the needs of the Copyright Office.

Entries for published and unpublished material are interfiled. Entries for supplementary registrations are interfiled with entries for basic registrations, and should be consulted in conjunction with the entry for the original registration. Entries pertaining to original copyrights secured before January 1, 1978 but not registered until on or after January 1, 1978 are interfiled with entries pertaining to original copyrights secured under Public Law 94-553. Entries appearing in the *Catalog* for the first time which pertain to pre-1978 registrations are filed and indexed in a separate section at the end of the *Catalog.*

Information pertaining to changes of copyright ownership is not included in the *Catalog,* but a search of Copyright Office files may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of $10 per hour.

For each registration listed, except for renewals and supplementary registrations, there has been deposited one or two copies or phonorecords (or in some instances other identifying material) of the work in accordance with the provisions contained in section 408 of Title 17 of the *United States Code.* Such deposits may be selected for inclusion in the collections of the Library of Congress. Library of Congress printed cards are available for many of the published works so selected. Orders for such cards or inquiries concerning them should be addressed to the Cataloging Distribution Service Division, Building 159, Navy Yard Annex, Washington, D.C. 20541.

For a more complete description of the contents of this issue of the *Catalog* see the Introduction.

Orders for individual issues, subscriptions for one or more parts, or for the complete *Catalog,* should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog.* Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington, D.C. 20559.

Administrative Classification System

Class TX:
Nondramatic Literary Works

Class PA:
Works of the Performing Arts

Class VA:
Works of the Visual Arts

Class SR:
Sound Recordings

Class RE:
Renewal Registration

Unpublished works are identified by a small "u" following the double letters in all classes except RE (e.g., TXu 1-617).

Organization of Parts

1 **Nondramatic Literary Works**
Class TX, excluding serials and periodicals

2 **Serials and Periodicals**
Class TX

3 **Performing Arts**
Class PA, excluding motion pictures and filmstrips (includes musical works, dramatic works, pantomimes, and choreographic works)

4 **Motion Pictures and Filmstrips**
Class PA

5 **Visual Arts**
Class VA, excluding cartographic materials (includes all other pictorial, graphic, and sculptural works)

6 **Maps**
Class VA

7 **Sound Recordings**
Class SR

8 **Renewals**
Class RE

introduction

Table of Contents

page
1 Current Registrations
379 Index
Pre-1978 Registrations (with Index)
531 Dramas and Works Prepared for Oral Delivery
535 Music
569 Abbreviations and Symbols

Part 3 lists all works registered in class PA, other than motion pictures and filmstrips, for the period covered by this issue, and also includes works of the performing arts (other than motion pictures and filmstrips) registered in other classes. The works listed include published as well as unpublished music, dramatic works, choreography, pantomimes, and certain audiovisual works other than motion pictures. Because the registration classes established by the Copyright Office under section 408(c) of Title 17 of the *United States Code* are for administrative purposes only, some works may be registered in class PA, and therefore included in this issue, which do not fall into the above categories. In such cases, see the Introduction to the part of the *Catalog* which corresponds to the nature of the work covered by the registration for a detailed description of the entry.

Basic Registrations

Each entry includes the items of information listed below, if available and applicable. Major areas of information in the bibliographic description are separated by paragraphing and by period-space-dash-space within paragraphs. Individual elements within these areas are separated by prescribed ISBD (International Standard Bibliographic Description) punctuation as indicated below.

Bibliographic Description

1. Title proper : other titles : other title information, including serial numbering and medium of performance / statement(s) of authorship.
2. Edition statement / statement(s) of authorship for the edition.
3. Place of publication : publisher, year of publication as stated on the work.
4. Physical description.
5. (Series ; numbering within the series : subseries ; numbering within the subseries)
6. Notes. Information is given here which serves to supplement the data that is given elsewhere in the entry in order to describe a work more accurately or identify it more explicitly, including, when appropriate, a statement that the registered work is published in or as part of another work, or is bound with another independent work.
7. International Standard Book Number.

Copyright Facts

1. Copyright symbol ©.
2. A statement of limitation of claim to a certain portion of the work if the application and notice on the work explicitly limit the claim (for works published before January 1, 1978 only).
3. Name of the copyright claimant.
4. Statement, preceded by the designation "Nature of copyrightable authorship," of information included in the application which delineates the authorship covered by the registration (included only when necessary for clarity).

5. Names of authors or titles given in the application which do not appear elsewhere in the entry.
6. Indication that an author's contribution to the work is anonymous, if so stated in the application.
7. Name of the employer in the case of a work made for hire, if so named in the application.
8. Information contained in the application which is related to the registration of an earlier version of the work.
9. Brief statement of preexisting material identified in the application, if not indicated elsewhere in the entry.
10. Brief statement of the new matter on which copyright is claimed, preceded by the abbreviation NM, if this information is given in the application and is not indicated elsewhere in the entry.
11. Year date of creation, preceded by the abbreviation DCR.
12. Date of publication (for published works only), preceded by the abbreviation PUB.
13. Effective date of registration, preceded by the abbreviation REG.
14. Registration number.

For published works, whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application is given first, followed by the phrase "in notice" and the data given on the work; e.g., PUB 10Jan78 (in notice: 1977). For works published before January 1, 1978, all major variances are reflected in the entry. For works published on or after January 1, 1978, variant or different names appearing in the notice are included for bibliographic purposes only if the name or name variant in the notice has not been entered elsewhere in the entry, and year dates appearing in the notice are given only if the latest year date in the notice is earlier than the date of publication given in the application.

Supplementary Registrations

Entries for supplementary registrations include the following items of information, if available and applicable.

1. Title and authors' names as they appeared in the basic registration.
2. Statement that the entry is for a supplementary registration, followed by the basic registration number and year date of registration.
3. Identification of corrected or amplified information which is not included in the catalog entry (i.e., address, citizenship, etc.).
4. Contents.
5. Copyright symbol ©.
6. Name of the copyright claimant.
7. Corrected/amplified information followed by the related information as it appeared in the basic registration, if the original information is included in the application for supplementary registration.
8. Effective date of supplementary registration, preceded by the abbreviation REG.
9. Supplementary registration number.

Contributors

The following individuals were primary contributors to cataloging or editing of entries appearing in this issue of the *Catalog of Copyright Entries.*

Phyllis D. Barber
Patricia A. Benson
Thomas A. Bland

Make his memory go away. (PAu 8-889.)

Zylks, Huey Douglas, 1935-.
Make his memory go away. (PAu 8-889.)

pre-1978 registrations

The following is a list of pre-1978 registrations which have not appeared in an earlier issue of the Catalog of Copyright Entries. *These works are assigned registration numbers in the classification system in use in the Copyright Office before January 1, 1978.*

An index of names and titles associated with the work is followed by the main entries, listed in order by registration number. Filing of the index is letter by letter, except in the case of inverted names which are filed up to the comma or parentheses, after which letter by letter filing is resumed. The entries are formulated in a single paragraph without ISBD (International Standard Bibliographic Description) punctuation. Some elements of information described in the Introduction to this part of the Catalog of Copyright Entries *are not included in the entries for pre-1978 registrations.*
